**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-24, 28-36, and 42-49, drawn to reactor apparatuses and subassemblies, classified in class 422, subclasses 188, 191, and 211.
  - II. Claims 25-27 and 37-41, drawn to methods of making and methods of using, for classes/subclasses see below.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the processes of Invention II can be practiced on an apparatus materially different from Invention I. For example, the processes of Invention II can be practiced on reactors/subassemblies that have no heating means on the coating.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

**If applicant elects Group I, applicant must additionally elect the following:**

4. This application contains claims directed to the following patentably distinct species of the claimed invention:

la. Claims 1-24 and 49, drawn to an apparatus for conducting simultaneous endothermic and exothermic reactions, classified in class 422, subclass 211.

lb. Claims 28-36, drawn to a continuous-flow catalytic plate reactor, classified in class 422, subclass 188.

lc. Claims 42-48, drawn to modular reactor sub-assemblies, classified in class 422, subclass 191.

**If applicant elects Group II, applicant must additionally elect the following:**

Ila. Claims 25-27 and 37-39, drawn to methods for performing endothermic and exothermic reactions, classified in class 48, subclass 197R.

Ilb. Claims 40 and 41, drawn to methods of producing a catalytic wall plate reactor, classified in class 29, subclass 890.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. Kevin P. Kerns whose telephone number is (571) 272-1178. The examiner can normally be reached on Monday-Friday from 8:00am-5:00pm.
